

FREE COMPOSTING WORKSHOPS

FOR LAGUNA BEACH RESIDENTS

Composting is a simple and natural way to turn your yard and food waste into valuable organic fertilizer for your home garden.

Compost improves soil health, helps retain moisture, and increases nutrient content.

Food scraps and yard waste currently make up 30 percent of what Californians throw away.

The City and Waste Management will offer 1 – hour long composting workshops throughout Spring 2024 at no cost to Laguna Beach residents.

Attendees will learn how to recycle yard and food waste into valuable organic fertilizer for the garden using simple composting practices.
